## PROJECTS

Feb 2023 – Present

### Social Media Website (CU\_IN)

Feb 2023 – Present

### Daily Journal website

- Through this website a user will be able to post their daily journals . In this project I will use mongodb and back-end development for storing the data entered by the user.

Dec 2022 – Jan 2022

### weather website

- I have created this website using Open weather API and this website is used to show the current weather of the area.

Nov 2022 – Nov 2022

### To Do list

- I have created a static website in which we can save our daily works to be done and use it as a checklist.

Aug 2022 – Sep 2022

Fashionista

- This is a simple website through which we can shop clothes . I have used simple html css and javascript to design this website and linked this website to a original shopping website.

Jul 2022 – Jul 2022

Dice Game

- This is a basic Dice game in which i have used javascript and 2 users can play at the same time and whoever gets the one on the dice first will win the game.

May 2022 – May 2022

Guess My number game

- In this game I have used basic javascript that will allow user to guess the number randomly generated by the system and count number of guess a user will make to reach the desired number.
